

# CREATIVE COLLAGE GENERATOR

## INTRODUCTION

This game is designed to stimulate your imagination and help you through periods of creative block. If you ever feel like you're fresh out of ideas, a few rounds of this card game will get your imaginative sparks flying.

The card game is easy to play. The rules are simple, and you don't need anything complicated. You can play the game with others or by yourself.

The purpose of the game is to flex your creative muscles, so you can make amazing digital collages. There are 216 possible combinations in this creative collage game to keep you firing on all cylinders!

## HOW TO PLAY

The cards are separated into three categories:

- **Background cards** give you a unique suggestion for a background image.
- **Subject cards** suggest the subjects of your collage.
- **Characteristic cards** tell you what kind of effects to apply to the subjects.

There are six cards in each category and every card is numbered from one to six.

The idea of the game is to pick one card from each category. And once you have a three-card set, you have the basis of a digital collage you can create!

There are two ways to play the game—one with a dice and the other by random selection.

## DICE VERSION

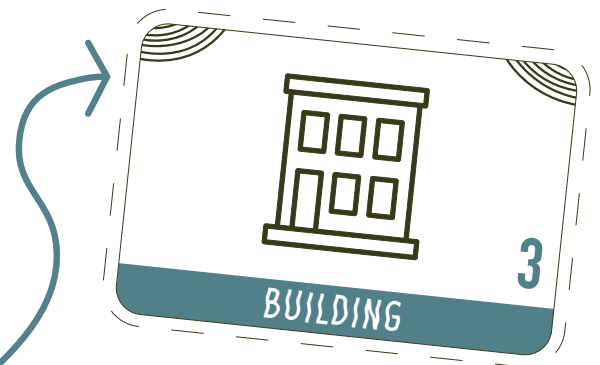

You'll need your own dice or you can use a [virtual dice](#).

## INSTRUCTIONS

Roll the dice three times:

1. With the number from your first roll, select the card from the Background category that has the same number.
2. The second roll will determine the Subject card.
3. And the third roll will identify the Characteristic card.

After three rolls of the dice, you'll have a complete set of three cards to start your digital collage!

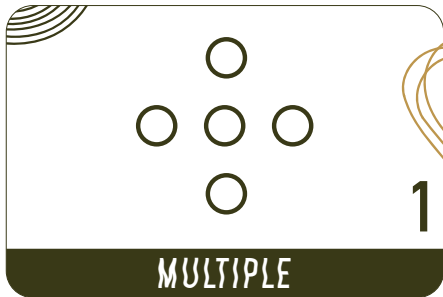

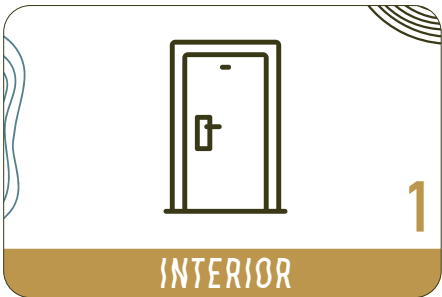

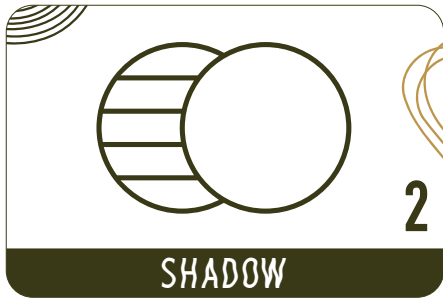

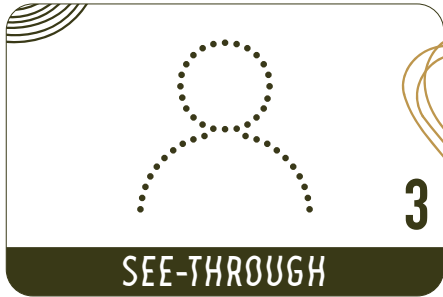

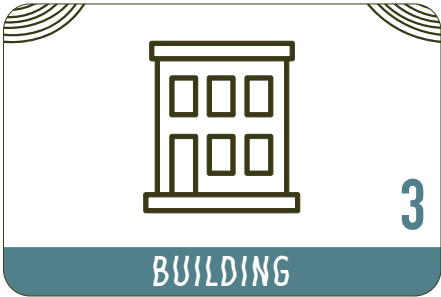

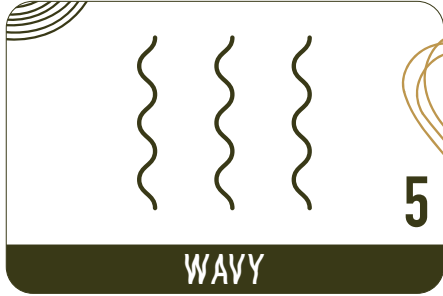

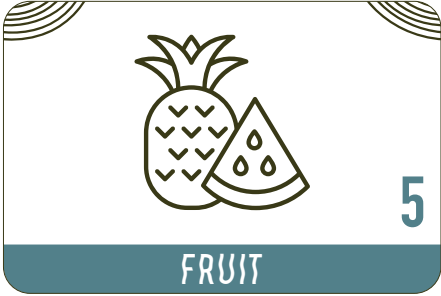

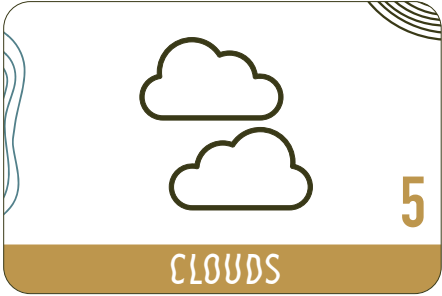

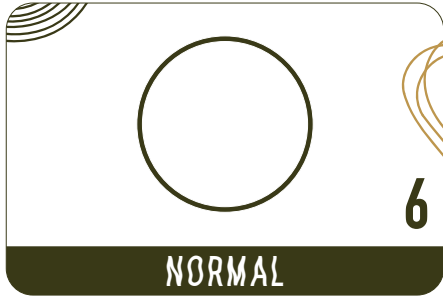

## RANDOM SELECTION VERSION

You'll have to print and cut out the cards.

## INSTRUCTIONS

1. Separate the cards into their categories.
2. When you have three separate stacks, give each one a shuffle.
3. Select one card at random from each set.

Then it's time to get busy creating!
